VOL. XIII.—EIGHTH SERIES

JANUARY—JUNE 1966

---

LONDON:

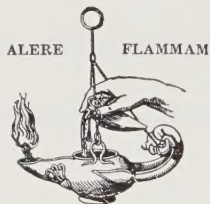

TAYLOR & FRANCIS LTD, RED LION COURT, FLEET STREET, E.C.4

“Meditationis est perscrutari occulta; contemplationis est admirari  
perspicua.... Admiratio generat quæstionem, quæstio investigationem,  
investigatio inventionem.”—*Hugo de S. Victore.*

---

——“Cur spirent venti, cur terra dehiscat,  
Cur mare turgescat, pelago cur tantus amaror,  
Cur caput obscura Phœbus furrugine condatur,  
Quid toties diros cogat flagrare cometas,  
Quid pariat nubes, veniant cur fulmina cœlo,  
Quo micet igne Iris, superos quis conciat orbes  
Tam vario motu.”

*J. B. Pinelli ad Mazonium.*

# CONTENTS OF VOL. XIII. Nos. (121-126)

## (EIGHTH SERIES)

### NUMBER 121—JANUARY

	PAGE
Oxidation Products of Titanium Carbide. By G. E. HOLLOX and R. E. SMALLMAN, Department of Physical Metallurgy, University of Birmingham.....	1
Observations in Quenched Magnesium. By J. S. LALLY, Cavendish Laboratory, Cambridge, England, and P. G. PARTRIDGE Central Electricity Generating Board Laboratories, Berkeley, England.....	9
Stress-induced Ordering of Interstitial Atoms Due to Dislocation Motion. By R. J. ARSENAULT, Metals and Ceramics Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee 37831.....	31
The Binding Energy of Oxygen to a Dislocation in Tantalum. By C. L. FORMBY and W. S. OWEN, Department of Metallurgy, University of Liverpool.....	41
The Spin-Orbit Interaction in Metals and Semiconductors. By A. O. E. ANIMALU, Cavendish Laboratory, Cambridge.....	53
Diffraction Contrast Analysis of Two-dimensional Defects Present in Silicon after Annealing. By G. R. BOOKER and W. J. TUNSTALL, Cavendish Laboratory, Cambridge, England.....	71
Application of the Dynamical Theory of Electron Diffraction to Ferromagnetic Crystals. By J. P. JAKUBOVICS, Cavendish Laboratory, University of Cambridge.....	85
Stresses on Secondary Systems due to Piled-up Groups of Dislocations of Arbitrary Orientation. By Z. S. BASINSKI, Division of Pure Physics, National Research Council, Ottawa, Canada, and T. E. MITCHELL, Department of Metallurgy and Center for the Study of Materials, Case Institute of Technology, Cleveland, Ohio, U.S.A.....	103
A Superconducting Galvanometer Employing Josephson Tunnelling. By J. CLARKE, Cavendish Laboratory, University of Cambridge.....	115
The Formation of Imperfections in Epitaxial Gold Films. By M. H. JACOBS, D. W. PASHLEY and M. J. STOWELL, Tube Investments Research Laboratories, Hinxton Hall, Cambridge.....	129
The Thermal Conductivity of Pyrolytic Graphite. By R. TAYLOR, U.K.A.E.A. Reactor Materials Laboratory, Culcheth, Warrington, Lanes.....	157
Complex Ions and Stress-Corrosion Cracking in $\alpha$ -brass. By E. N. PUGH and A. R. C. WESTWOOD, Research Institute for Advanced Studies (Martin Company), Baltimore, Maryland.....	167
On the Electron Microscopy of Fission Fragment Damage. By L. T. CHADDERTON, D. V. MORGAN, I. MCC. TORRENS and D. VAN VLIET, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge, England.....	185
The Strengths of Flame-polished Sapphire Crystals. By F. P. MALLINDER and B. A. PROCTOR, Rolls-Royce Limited, Derby.....	197
Correspondence :	
Plastic Deformation of Diamond at Temperatures below 1800°C. By T. EVANS and R. K. WILD, J. J. Thomson Physical Laboratory, University of Reading, Whiteknights Park, Reading, Berkshire, England.....	209

Influence of Electron Concentration on the Elasticity of Al Alloys. By G. BRADFIELD, National Physical Laboratory, Teddington, Middlesex.....	211
Reviews of Books.....	215

## NUMBER 122—FEBRUARY

The Elastic Energy of a Parallelogram-shaped Dislocation Loop. By D. J. BACON and A. G. CROCKER, Department of Physics, Battersea College of Technology, London, S.W.11.....	217
Long-range Elastic Interaction between Dislocations and Dislocation Loops. By R. CHANG, North American Aviation Science Center, Thousand Oaks, California.....	237
The Diffusion of Gold in Lead Single Crystals. By G. V. KIDSON, Chalk River Nuclear Laboratories, Atomic Energy of Canada Limited, Chalk River, Ontario, Canada.....	247
On the Dislocation Arrangement in Deformed Crystals of Zinc. By P. KRATOCHVÍL, Physics and Chemistry of Solids, Cavendish Laboratory, Cambridge.....	267
Equilibrium Distribution of Pinning Points at Dislocations Under an External Vibrational Stress of Small Amplitude. By EVA BODE, Erlangen Fredrich-Bauer-Str. 5-VII, Germany.....	275
An Experimental Determination of Electrical Resistivity of Dislocations in Aluminium. By J. G. RIDER and C. T. B. FOXON, Department of Physics, Battersea College of Technology, London, S.W.11.....	289
Temperature Oscillations in Molten Metals and their Relationship to Growth Striae in Melt-grown Crystals. By D. T. J. HURLE, Ministry of Aviation, Royal Radar Establishment, Worcestershire, England.....	305
The Temperature Dependence of the Fracture Stress of Metals. By P. FELTHAM and A. S. BEYNON, Department of Physics, Brunel College, London, W.3.....	311
Creep and Stress Relaxation Studies with Polycrystalline Magnesium. By G. B. GIBBS, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Glos.....	317
Note on Ionized Impurity Scattering in Solids. By I. ADAWI, Battelle Memorial Institute, Columbus, Ohio.....	331
An Investigation of the Vacancy Annealing Kinetics and Precipitate Structure in Quenched Gold. By R. W. SIEGEL, Materials Research Laboratory and Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois.....	337
A Measurement of the Electrical Resistivity of Lattice Vacancies and Stacking Faults in Gold. By R. W. SIEGEL, Materials Research Labora- tory and Department of Mining, Metallurgy and Petroleum Engineering, University of Illinois, Urbana, Illinois.....	359
A Mechanism for Knitting the Dislocation Network. By H. M. MIEKK-OJA, Laboratory of Physical Metallurgy, Institute of Technology, Otaniemi, Finland.....	367
Energy of Formation of Lattice Vacancies in Lead from Equilibrium Resistivity and Quenching Studies. By A. J. LEADBETTER, D. M. T. NEWSHAM and N. H. PICTON, Department of Physical Chemistry, Univer- sity of Bristol.....	371
Deformation Twinning in Corundum. By A. H. HEUER, Houlds- worth School of Applied Science, University of Leeds.....	379

	PAGE
Contrast from Large Prismatic Dislocation Loops. By W. L. BELL and G. THOMAS, Department of Mineral Technology, College of Engineering, University of California, Berkeley, California.....	395
Correspondence :	
Observations of Silicon at High Temperature by Transmission Electron Microscopy. By G. R. BOOKER, Cavendish Laboratory, University of Cambridge, Cambridge, England, and U. VALDRÈ, Istituto di Fisica, University of Bologna, Italy.....	421
Dislocated Decoration in Sodium Chloride Single Crystals by Electron Bombardment. By A. K. GREEN, F. BIEN and E. BAUER, Michelson Laboratory, China Lake, California.....	427
On the Yield Stress of Polycrystalline Iron at Low Temperatures. By S. B. MCRICKARD, Brookhaven National Laboratory, Upton, New York.....	433
The Force of a Dislocation. By G. W. LEWTHWAITE, Dounreay Experimental Reactor Establishment, Dounreay, Caithness.....	437

## NUMBER 123—MARCH

The Role of the Grain Boundary in the Elevated Temperature Fracture Behaviour of Magnesia. By A. J. MOUNTVALA and G. T. MURRAY, Materials Research Corporation, Orangeburg, New York.....	441
The Effects of Environment on Surface Pit Formation in Aluminium. By M. B. KASEN, R. TAGGART and D. H. POLONIS, College of Engineering, University of Washington, Seattle, Washington, U.S.A.....	453
The Vibrational Spectrum of an Isotopically Disordered Crystal. By H. J. MARIS, Case Institute of Technology, Cleveland, Ohio, U.S.A.....	465
The Effect of Sub-lattice Order in Binary Alloys with One Magnetic Component. II. By D. A. LAVIS, Mathematics Department, Manchester College of Science and Technology, and W. M. FAIRBAIRN, Physics Department, The University of Lancaster.....	477
Calculation of Granato-Lücke Frequency Dependent Internal Friction as Influenced by Prolonged Vibration. By EVA BODE, Erlangen, Friedrich-Bauer-Str. 5-VII, Germany.....	493
The Low Temperature Transport Properties of the Palladium-Silver Alloy Series. By J. S. DUGDALE and A. M. GUÉNAULT, Division of Pure Physics, National Research Council, Ottawa, Canada.....	503
Electric Field Gradients in Ionic Crystals. III. Nuclear Quadrupole Resonance in Thorium Tetrachloride. By J. RAMAKRISHNA, Physics Department, Andhra University, India.....	515
Formation and Migration Energies of Vacancies in Copper. By P. WRIGHT and J. H. EVANS, University College of North Wales, Bangor..	521
The Annealing of Deformed Sodium. By D. GUGAN, H. H. WILLS Physics Laboratory, Royal Fort, Bristol.....	533
A Statistical Theory of Flow Stress and Work-hardening. By U. F. KOCKS, Division of Engineering and Applied Physics, Harvard University, Cambridge, Massachusetts, U.S.A.....	541
The Magnetic Properties of Platinum Cobalt near the Equiatomic Composition. Part I. The Experimental Data. By R. A. MCCURRIE and P. GAUNT, Department of Physics, University of Sheffield, Sheffield 10.	567

	PAGE
The Magnetic Properties of Platinum Cobalt near the Equiatomic Composition. Part II. Mechanism of Magnetic Hardening. By P. GAUNT, Department of Physics, University of Sheffield, Sheffield 10. . . .	579
Diffusion Creep of a Thin Foil. By G. B. GIBBS, Central Electricity Generating Board, Berkeley Nuclear Laboratories, Berkeley, Glos. . . . .	589
Plastic Deformation Patterns on Cleavage Surfaces of Lithium Fluoride. By C. T. FORWOOD and B. R. LAWN, H. H. Wills Physics Laboratory, University of Bristol. . . . .	595
Electron Binding Energy Effects in Compton Scattering from Graphite. By MALCOLM COOPER and J. A. LEAKE, Crystallographic Laboratory, Cavendish Laboratory, Cambridge, England. . . . .	603
The Rearrangement of Facets on Silver. By J. G. ALLPRESS and J. V. SANDERS, Commonwealth Scientific and Industrial Research Organization, Division of Tribophysics, University of Melbourne. . . . .	609
Correspondence :	
Magnetic Properties of Copper Acetate at Low Temperatures. II. By BHAGAWATI CHARAN GUHA, Department of Pure Physics, University of Calcutta, Calcutta. . . . .	619
Determination of Foil Thickness. By C. L. FORMBY, Department of Metallurgy, University of Liverpool. . . . .	621
Void Formation by Non-basal Glide in Ice Single Crystals. By JIRO MUGURUMA, SHINJI MAE and AKIRA HIGASHI, Department of Applied Physics, Hokkaido University, Sapporo, Japan. . . . .	625
On the Transition to the Third Stage of Work-hardening in Metal Crystals. By P. FELTHAM, Department of Physics, Brunel College, London, W.3. . . . .	631
Remarks on a Theory of Linear Strain Hardening. By GUNTHER SCHOECK, Instituto de Fisica, Centro Atomico Bariloche, Argentina and Institut für theoretische und angewandte Physik der Technischen Hochschule, Stuttgart, Germany. . . . .	635
Determination of the Burgers Vector of Dislocations in Deformed Uranium Carbide. By B. L. EYRE and A. F. BARTLETT, Metallurgy Division, A.E.R.E., Harwell, Berks. . . . .	641
Nature of Diamond Coat. By M. SEAL, Engelhard Hanovia Inc., 497 Delancy Street, Newark, New Jersey, 07105. . . . .	645
On the Annealing of Dislocation Loops by Climb. By D. N. SEIDMAN and R. W. BALLUFFI, Department of Materials Science and Engineering and Materials Science Center, Cornell University, Ithaca, New York. . . . .	649
Reviews of Books. . . . .	655
Book Notices . . . . .	656

## NUMBER 124—APRIL

The Energies of Stacking-fault Tetrahedra in F.C.C. Metals. By T. JOSSANG, Institute of Physics, University of Oslo, Oslo, Norway, and J. P. HIRTH, The Ohio State University, Columbus, Ohio. . . . .	657
Low Frequency Dielectric Losses in Thin Films of NaCl and NaBr. By J. C. MACFARLANE and C. WEAVER, Department of Natural Philosophy, University of Strathclyde, Glasgow. . . . .	671
Slip in Single Crystals of Mercury. By J. G. RIDER and F. HECKSCHER, Department of Physics, Battersea College of Technology, London, S.W.11	687

	PAGE
Work Hardening in Polycrystalline Ordered Alloys. By C. A. PAMPILLO, División Física de Metales, Centro Atómico Bariloche (C.N.E.A.), Instituto de Física 'Dr. J. A. Balseiro' (Universidad de Cuyo), S. C. de Bariloche (R.N.), Argentina.....	693
Nuclear Magnetic Resonance in Liquid Copper Alloys. By R. L. ODLE, Department of Mining, Metallurgy and Petroleum Engineering and Materials Research Laboratory, University of Illinois, Urbana, Illinois, and C. P. FLYNN, Department of Physics and Materials Research Laboratory, University of Illinois, Urbana, Illinois.....	699
Effect of Gaseous Environment on the Structure of Sputtered GaAs Films on NaCl Substrates. By T. EVANS and A. J. NOREIKA, J. J. Thomson Physical Laboratory, The University, Whiteknights Park, Reading, Berks.....	717
The Correlation between the Critical Shear Stress of Neutron Irradiated Copper Single Crystals and the Density of Defect Clusters. By M. J. MAKIN, F. J. MINTER and S. A. MANTHORPE, Metallurgy Division, U.K.A.E.A. Research Group, Atomic Energy Research Establishment, Harwell.....	729
Many-body Effects in Electron Scattering. By V. HEINE and P. NOZIÈRES, Cavendish Laboratory, Cambridge, and J. W. WILKINS, Laboratory for Atomic and Solid State Physics, Cornell University, Ithaca, New York.....	741
Application of Anisotropic Elasticity Theory to the Plastic Deformation in Hexagonal Zinc. By MAN HYONG YOO and CHUAN-TSENG WEI, Department of Metallurgy, Mechanics and Materials Science, Michigan State University, East Lansing, Michigan.....	759
An Electron Microscope Study of Precipitation in MgO Single Crystals. By M. H. LEWIS, H. H. Wills Physics Laboratory, University of Bristol...	777
Anomalous Superconducting Surface Nucleation Fields. By P. R. DODGE and KWAN SIK-HUNG, Department of Physics, Battersea College of Technology, London, S.W.11, and D. R. TILLEY, Mullard Research Laboratories, Redhill, Surrey.....	795
Dispersion Hardening of Copper Single Crystals. By R. EBELING and M. F. ASHBY, Institut für Metallphysik, Hospitalstrasse 12, Göttingen, West Germany.....	805
The Fatigue of Beta-brass. By H. D. WILLIAMS and G. C. SMITH, Department of Metallurgy, Cambridge University.....	835
Dislocation Densities in Slowly Cooled Aluminium Single Crystals. By ERIK NES and BJARNE NØST, Institute of Physics, University of Oslo, Blindern, Norway.....	855
Correspondence:	
Lattice Defects in Neutron Irradiated $\alpha$ Cu Solid Solution Alloys. By T. J. KOPPENAAL, W. C. T. YEH and R. M. J. COTTERILL, Metallurgy Division, Argonne National Laboratory, Argonne, Illinois.....	867
Stress Field of Planar Curved Dislocations. By JAMES C. M. LI, Henry Krumb School of Mines, Columbia University, New York, N.Y. ....	873
A General Expression for the Average Propagator in a Disordered System. By T. LUKES, Department of Applied Mathematics and Mathematical Physics, University College, Cardiff.....	875
Reviews of Books.....	877
Book Notices.....	880

## NUMBER 125—MAY

	PAGE
Melting Criterion for Cubic Crystals on the Basis of the Anisotropic Dispersive Continuum Model. By K. C. SHARMA, Physics Department, Allahabad University, Allahabad, India, and S. K. JOSHI, Physics Department, University of California, Riverside, U.S.A.....	881
Electron Irradiation of Uranium at 7°K. By J. C. JOUSSET, Centre d'Études Nucléaires de Fontenay-aux-Roses, France, and A. LUCASSON and P. LUCASSON, Laboratoire de Chimie Physique de la Faculté des Sciences de Paris, Orsay, France.....	887
The Stress Relaxation of Zone-refined Iron at 77°K. By PETER J. WRAY and G. T. HORNE, Metals Research Laboratory, Carnegie Institute of Technology, Pittsburgh 13, Pennsylvania.....	899
On Low Temperature Internal Friction Peaks in Deformed Metals. By P. FELTHAM, Department of Physics, Brunel College, London, W.3.....	913
Measurements of the Magneto-electric Susceptibility of Polycrystalline Chromium Oxide. By T. H. O'DELL, Department of Electrical Engineering, University of Bristol.....	921
Size and Sign of the Burgers Vector from Transmission Micrographs. By W. BOLLMANN, Battelle Memorial Institute, Geneva, Switzerland....	935
Thermal Etching on Aluminium Single Crystals. By DAG FOSS and OLE H. HERBJØRSEN, Institute of Physics, University of Oslo, Oslo 3, Norway.....	945
The Nature of Dislocation Loops in Quenched Aluminium. By M. H. LORETTO, L. M. CLAREBROUGH and P. HUMBLE, Commonwealth Scientific and Industrial Research Organization, Division of Tribophysics, University of Melbourne, Australia.....	953
The Effect of a Surface Oxide Film on the Lifetime of Vacancies in Quenched Specimens. By J. E. HARRIS and B. C. MASTERS, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire, U.K.....	963
The Proximity Effect in the Lead-Copper System by Electron Tunnelling. By C. J. ADKINS and B. W. KINGTON, Royal Society Mond Laboratory, Cambridge, England.....	971
The Electrical Properties of Liquid Mercury. By N. F. MOTT, Cavendish Laboratory, Cambridge.....	989
The Polymerization of Crystalline Trioxane. I. Evidence for a Cooperative Mechanism. By H. B. VAN DER HEIJDE and H. NAUTA, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Research N.V.).....	1015
The Polymerization of Crystalline Trioxane. II. Experiments with Irradiated Trioxane (and Tetraoxane) Calculation of the Crystal Field of Trioxane. By H. NAUTA, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Research N.V.).....	1023
The Polymerization of Crystalline Trioxane. III. Experiments with Irradiated Trioxane Single Crystals. By H. B. VAN DER HEIJDE and P. H. G. VAN KASTEREN, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Research N.V.).....	1039
The Polymerization of Crystalline Trioxane. IV. The Spontaneous Polymerization. By H. B. VAN DER HEIJDE, Koninklijke/Shell-Laboratorium, Amsterdam (Shell Research N.V.).....	1055
Mixed Populations of Vacancy and Interstitial Precipitates. By R. V. HESKETH and G. K. RICKARDS, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire.....	1069
Correspondence :	
Etching Corundum with Silicon. By F. H. REYNOLDS and A. B. M. ELLIOT, Post Office Research Station, Dollis Hill, London, N.W.2.	1073

	PAGE
Direct x-ray Observation of Dislocations during Annealing in Aluminium Single Crystals. By BJARNE NØST and GUNNAR SØRENSEN, Institute of Physics, University of Oslo, Blindern, Norway.....	1075
Neutron Radiation Damage in Tungsten Single Crystals. By K. LACEFIELD, J. MOTEFF and J. P. SMITH, Nuclear Materials and Propulsion Operation, General Electric Company, Cincinnati, Ohio	1079
Etchable Line Defects in Crystals are not necessarily Dislocations. By R. L. FLEISCHER and R. M. WALKER, General Electric Research and Development Center, Schenectady, New York, U.S.A.....	1083
Streak Contrast in Field-ion Micrographs. By D. G. BRANDON, Battelle Memorial Institute, Geneva, Switzerland.....	1085
Reviews of Books.....	1089
Book Notices .....	1096

---

## NUMBER 126—JUNE

Transmission Electron-microscopic Studies on Surface Effect upon Dislocation and Friction Stress in MgO. By K. OGAWA, Department of Metallurgy, University of Cambridge .....	1097
The Thermal Annealing of Heavy Ion Damage in Copper. By R. V. HESKETH and G. K. RICKARDS, Berkeley Nuclear Laboratories, Berkeley, Gloucestershire .....	1105
The Temperature Dependence of the Infra-red Absorption due to U Centres in Alkali Halides. By J. R. HARDY, Theoretical Physics Division, A.E.R.E., Harwell, Berks.....	1113
The Microstructure of Magnesium Oxide Cleavage Surfaces. By M. H. LEWIS, School of Physics, University of Warwick, Coventry.....	1123
Diffuse Scattering in Electron Diffraction Patterns. By F. FUJIMOTO and A. HOWIE, Cavendish Laboratory, University of Cambridge.....	1131
Magnetomorphic Oscillations due to Open Orbits. By A. B. PIPFARD, Cavendish Laboratory, Cambridge, England.....	1143
Dose Dependence of F-centre Production by Fast Neutrons in Magnesium Oxide. By B. HENDERSON and R. D. KING, Metallurgy Division, Atomic Energy Research Establishment, Harwell, Didcot, Berks.	1149
The Brittle-Ductile Transition in Polycrystalline Aluminium Oxide. By E. PASSMORE, A. MOSCHETTI and T. VASILOS, Avco Corporation, RAD Division, Wilmington, Massachusetts.....	1157
Deformation Twinning in Rhenium Single Crystals. By R. A. JEFFERY and E. SMITH, Associated Electrical Industries Research Laboratory, Aldermaston .....	1163
The Structure of Liquid Mercury. By V. G. RIVLIN, R. M. WAGHORNE and G. I. WILLIAMS, Fulmer Research Institute Ltd., Stoke Poges, Bucks..	1169
An Investigation of Matched Cleavage Faces of Sodium Chloride Crystals. By D. J. STIRLAND, Allen Clark Research Centre, The Plessey Company Limited, Caswell, Towcester, Northants.....	1181
A Single Surface Analysis of Deformation Twins in Crystalline Mercury. By A. G. CROCKER, F. HECKSCHER, M. BEVIS and D. M. M. GUYONCOURT, Department of Physics, Battersea College of Technology, London, S.W.11	1191

	Page
Accommodation of Misfit across the Interface between Single-crystal Films of Various Face-centred Cubic Metals. By J. W. MATTHEWS, School of Engineering and Applied Science, University of Virginia, Charlottesville, Virginia .....	1207
The Crystallography of the Austenite-Cementite Transition. By A. W. SLEESWYK, Natuurkundig Laboratorium der Rijks-Universiteit, Westersingel 34, Groningen, Netherlands.....	1223
Measurements of Spontaneous Bending attributed to Surface Stresses in Thin Crystals in Aluminium Nitride. By C. M. DRUM, Atomic Energy Research Establishment, Harwell.....	1239
Electron Microscope Image Contrast of Double Loops in Quenched Aluminium. By W. J. TUNSTALL, Cavendish Laboratory, Cambridge, England, and P. J. GOODHEW, Department of Physical Metallurgy, University of Birmingham, Birmingham, England.....	1259
Ultrasonic Quantum Oscillations and the Fermi Surface of Zinc. By A. MYERS and J. R. BOSNELL, Physics Department, The University, Leeds	1273
Correspondence :	
Streak Contrast in Field-ion Micrographs. By B. RALPH and K. M. BOWKETT, Department of Metallurgy, Cambridge University.....	1283
Faulted Defects in Quenched Copper and Silver. By L. M. CLAREBROUGH, R. L. SEGALL and M. H. LORETTO, Division of Tribophysics, Commonwealth Scientific and Industrial Research Organization, University of Melbourne .....	1285
The Yield Stress of Silver Chloride. By M. T. SPRACKLING, H. H. WILLS Physics Laboratory, University of Bristol.....	1293
The Symmetrical Second-rank Tensor in the Mohr Diagram. By A. W. SLEESWYK and H. A. FERWERDA, Natuurkundig Laboratorium der Rijks-Universiteit, Westersingel 34, Groningen, Netherlands..	1297
Crystalline Structure and the Fatigue Strength of Metals. By V. N. WHITTAKER, Department of Metallurgy, University of Aston in Birmingham .....	1301
Configurational Changes Resulting from Dislocation Intersections. By CHARLES L. BAUER, Department of Metallurgy and Materials Science, Carnegie Institute of Technology, Pittsburgh, Pennsylvania 15213.....	1303
Annealing Kinetics of Faulted Loops in Aluminium. By G. SAADA, IRSID, 185 rue Pt. Roosevelt, 78 St. Germain en Laye, S. et O., France.....	1307
Reviews of Books.....	1311
Subject Index .....	1313
Index of Authors (with Titles).....	1320
List of Contents .....	iii
